

SITE LOCATION	DESCRIPTION	COMMENTS
Golf Course E. of Manhattan off LaPalco Gretna	Timberlane Country Club has several areas of SACM mostly at or near the cart paths. It appears that the ACM cart paths have been covered with shells over the years. Recently, the course has moved towards being more exclusive but they still have a few yearly "public" tournaments.	One area of concern is near the restrooms on the back nine. This area is highly trafficked as is evidence by the dilapidated condition of the ACM. Residential housing surrounds the course.
JM Landfill (LF) 4 th St & Ames Marrero	Appr. 2 acre site of mostly surface ACM (SACM) near the former Johns-Manville facility. Possibly this was the area for storing the ACM for public "give-a-way".	Much of the SACM is friable. There is evidence of persons accessing the site as there are no restrictive barriers.
Lowery's Cable 4 th St & Eiseman Marrero	Field with several areas of SACM nearby the JM LF area. Part of this area is used by for parking by customers of businesses across the street.	Formerly part of the JM facility and now "owned" by Lowery Brothers Rigging Center. Publicly accessible.
Drive-in theater N. of WB Frwy near Saddler St Westwego	6.2 acre field that has several areas of SACM. The former theater is mostly overgrown with grass and is brush-hogged regularly.	Surrounded by houses to the N & W, a canal to the E, and the WB Expwy to the S. Realtor sign "Jerry Bailly w/ Marrero Land 341-1635
LaPalco LF W. of Westwood Dr off LaPalco Dr Westwego	A former dump that is now heavily wooded and overgrown. Almost no visible ACM on the last site visit. A residential area lies to the far E. The Parish maintains the right-of-way near the Blvd. part of the site.	Reportedly, LaPalco Blvd. was built through the dump site. The other portion is referred to as the Garden Rd LF.
Garden Rd LF Garden Rd and Acre St Westwego	A road accesses the site from Acre St and is restricted. Locals report that large volumes of the "our" ACM is located here and that the site is now used for horses.	Supposedly the other part of the LaPalco LF.
Under houses and inside garages/sheds	118 properties have been identified with ACM located under the houses and/or garage/shed.	Nearly impossible to remove and very difficult to encapsulate.
Businesses	14 Business locations of various SACM	Not w/in scope of action
Parish workers	Need training & response mechanism	Utilities personnel also.
